## Projects Experience :

- **Project Name:** SVT Temple Of North California
  - **Role:** Frontend Developer
  - **Tool Used:** Bootstrap,
  - **React Description:** This website comes with an online pooja booking platform where users can check pooja timings and book poojas online, We have integrated a Stripe payment gateway for this project. Users can also sponsor and donate to events. This has both admin and user panels so that the admin can manage all users registered, orders booked, and fulfillment for pooja requests.
- 
- **Project Name:** Admin management
  - **Role:** Frontend Developer
  - **Tool Used:** Bootstrap, Next Js , MUI Material
  - **Description:** The Admin Management System is a web-based application designed to control access to various pages and features within a website or application. The system primarily focuses on two user roles: User and Admin. Users can only access specific pages based on their assigned permissions, while Admins have unrestricted access to all pages and features.
- 
- **Project Name:** CRM
  - **Role:** Frontend Developer
  - **Tool Used:** Bootstrap, React
  - **Description:** A Customer Relationship Management (CRM) system is a software application or suite of tools designed to help businesses manage their interactions and relationships with customers and potential customers. It serves as a central hub for collecting, organizing, and analyzing customer data to improve customer service, sales, and overall business performance
- 
- **Project Name:** Skyline Builderz
  - **Role:** Frontend Developer
  - **Tool Used:** Bootstrap, React
  - **Description:** Skyline Builderz is a sleek and modern React template, designed specifically to present your app in the best possible light. Skyline Builderz offers everything you need to highlight its features, uses, pricing, and services.
